# PURVIEW® Viewer Tools

Report Information- The report text for the currently selected study appears in this panel

Study List- Study list panel presents a related studies list

Navigate- Navigate within a series using the left click or curser keys

Zoom & Pan- Zoom images using the scroll wheel, or use the "=" and "-" keys.

Window & Level- Adjusts an image's W/L via dragging up & down with the left click. Select CTRL for fine W/L

Reset W/L- Resets to the image's default W/L

Image Sharpening - Allows access to presets determined at the modality

Invert- Invert an image's channels

Demographics- Toggle study information on and off

Triangulation- Triangulate orthogonal series

Reference Lines- Apply guidelines on orthogonal series from the same study

CINE Tool- Allows a series of images to be displayed like a movie

Series Reposition- Drag and drop series within view ports to other View ports

Linked Series- Perform a set of common operations (navigate, zoom, pan, etc)

Magnifying Glass- Allows for a closer look at the selected view-port

Eraser- Select and erase measurement and markup

Revert to original- Reset a series of images to its original state

Collaboration- Allows users to share their screen with other participants

Toggle Markup and Annotation- Toggle the visibility of overlays across all studies

Linear Measurement- When viewing US Echo, measurement, time and velocity are shown.

Ellipse ROI- Select the tool then left click and drag the mouse (mm)

Circle ROI- Select the tool, then left click and drag the mouse to select your view

Rectangle ROI- Select the tool then left click and left click again to end measurement

Freeform ROI- Select the tool and then left click.

Line Annotation- Draw a line

Arrow Annotation- Draw an arrow

Rectangle Annotation- Draw a rectangle

Ellipse Annotation- Draw an ellipse

Circle Annotation- Draw a circle

Polygon Annotation- Draw a polygon

Freehand Annotation- Allow users to draw a freeform markup

Text Annotation- Apply text to an image

Angle Measurement- Manually make angle measurements

Point- Measures the value of a specfic point

Spine Labeling- Add specific labels to an image

Ratio Tool- Use the tool to draw lines and provide measurements and ratio

Free Rotate- Rotate the image by left clicking and dragging the mouse

Export- Export an image as JPEG or PNG

Paper Printing- Perform a paper print of images on screen

Select Hanging Protocol- Choose a hanging protocol to apply to the study

Screen Layout- Access study compare or change the layout of each monitor

Change Rendering- Adjust slice thickness, final and interactive quality, change MIP, and adjust rendering presets

Curved MPR- Select MPR, ADV or 3D view mode, select tool and create curved MPR

Advanced visualization- 3D, MPR, Curved MPR, Fusion

Cut Planes (3D)- Rotate 3D Volume to desired view and select tool.

Scalpel (3D)- Remove or isolate a segment of the image. Drag mouse around desired area, then click region to keep. Reset will revert all segments.
